

ANTI-THEFT PROTECTION FOR CARAVANS

ANTI-THEFT PROTECTION

SAFETY LOCKS – THE EFFECTIVE DETERRENT AGAINST THEFT

SAFETY PREMIUM – THE NEW ANTI-THEFT PROTECTION- GENERATION

Safety Premium also meets the highest international safety standards such as the criteria for the “Sold Secure Gold Standard” (UK), “SBSC tested” (Sweden) and “SCM tested” (the Netherlands).

The sturdy steel construction with powder-coated housing and a solid galvanised bolt (free of chromium(VI)) is supplied with two keys.

WINTERHOFF ANTI-THEFT DEVICES

ROBSTOP WS 3000 PLUS

Reinforced, hardened design with special lock cylinders and certificates.

ROBSTOP WS 3000

Standard version without certificates.

SAFETY COMPACT

The tried-and-tested solution offers protection both on the road and when parked. So the caravan remains secure even when taking a break.

SAFETY PLUS

With additional drill protection Thanks to especially high-strength steel, additional reinforcements and the lock with drill protection, the Plus version offers even greater anti-theft protection even in unsafe areas. The red colour also means: This caravan is perfectly secured.

FOR MORE SAFETY – ANY TIME, ANYWHERE

COMFORTING PROTECTION FOR YOUR VALUABLES

Your property is secure against outside access behind solid steel walls. Only the double sided key will open the stable round bolts of the safe door. Independent of power or batteries, the safe is positioned inside the caravan and can be secured under the vehicle chassis using a mounting plate.

SAFETY COMPACT FOR PREMIUM CORNER STEADIES FROM 2006 YEAR OF MANUFACTURE

Easy to use, 2-part, mechanical immobiliser for caravans.

The Safety Compact for Premium corner steadies prevents the steady legs from being cranked up. This secures the caravan into position. Simply turn the legs down, insert safety lock and push in lock. Now you can spend a nice, relaxing day at the beach or in the city. Ensures additional security during longer periods when the caravan is not being moved, e.g. over the winter months.

SAFETY-BALL

The Safety-Ball supplements the AL-KO anti-theft devices on the towbar in stationary operation. The hard plastic safety catch drops into the coupling heads when uncoupled and prevents the spherical head engaging, thus also preventing unauthorized coupling.
